

Clic Dual Wheels

Click them on in seconds
and without any tools!

With one "Clic", the dual wheels are seated firmly and with absolutely no play and are "de-cliced" just as quickly.

The ideal dual wheels for:

- **ATVs**
- **Offroad 4x4 cars**
- **Municipal equipment carriers**
- **Motor mowers**
- **Skid steer loaders**
- **and many other vehicles with wheel weights up to approx. 35 kg.**

It is only thanks to Clic dual wheels that this steep slope can be driven **safely**, even on the contour lines. ⇨

Clic 5.00x12 with AS tread twin wheels give the AEBI TC 07 the necessary tractive force and stability.

Clic dual wheels are **officially recommended** by **A. Carraro** as a dual wheel system. Here is the Rondo on a test drive.

Clic twin wheels give this Bobcat the necessary stability, even on difficult terrain.

Equipped with Clic dual wheels, there are almost no more limits to the way you can use your 4x4 Mitsubishi L200.
